

Your Pricing Model Already Sets You Apart. Operationalize It.

Majesco P&C Enterprise Rating gives insurers the flexibility to bring existing actuarial models and rating logic into an enterprise deployment tool. Actuaries stay in control, IT handoffs are reduced or eliminated, and pricing changes can move from model to production faster without disrupting the systems and processes that work today.

WHAT MATTERS MOST

Purpose-built capabilities for modern underwriting and rating software

Eliminate the handoff between pricing and rating

Connect actuarial pricing to rating deployment with less IT handoff, moving model changes into production faster while maintaining governance.

Bring what you have into what's next

Bring existing models and rating logic into a governed, API-driven enterprise foundation without starting over.

Accelerate speed to market

Move pricing changes into production faster, with the flexibility to respond to market demands across complex products and channels.

BUILT FOR MODERN RATING OPERATIONS

AI-Powered Workbook Generation transforms approved filing content into a structured rating workbook in as little as **30 minutes**, reducing manual entry and transcription risk while helping teams launch new products faster.

Next Generation Rate Analyzer helps insurers evaluate proposed pricing changes against in-force portfolio data, providing earlier visibility into premium and loss impacts and increasing confidence before deployment.

We are designing our technology solution to help power our future growth, and Majesco Enterprise Rating offers us a scalable platform, that fits well with our evolving technology architecture that we are developing as part of our modernization program."
