

Proactive Risk Management for Modern Loss Control

As property risks grow more complex across the industry, insurers need smarter, faster, digital ways to manage risk, strengthen resilience, and protect profitability. Built for insurers, Majesco Loss Control combines property risk insight, governed AI capabilities, digital survey flexibility, and connected audit workflows to help teams assess risk efficiently, improve underwriting decisions, and move from inspection to action faster. With connected data, configurable workflows, and clearer visibility across the survey lifecycle, insurers can reduce manual effort, improve consistency, and better support policyholders.

Property Risk Insight

Digital Survey Flexibility

Governed AI Assessments

Leverage intelligent insights from more than

4.6 Billion Data Points

to elevate underwriting and reinsurance decisions

Tap into a vast property intelligence dataset built on

262 Million Images

for broader, deeper risk insight

19.6 Million Surveys

used to strengthen portfolio-level visibility and decision-making

WHAT MATTERS MOST

AI-enabled risk assessment and decision support

Identify property risk earlier

Built in property risk insight helps insurers identify property risks earlier and respond more proactively to catastrophe exposure, enabling stronger risk-resilient strategies with customers.

Turn recommendations into action

Majesco Loss Control uses governed AI-assisted workflows to turn survey findings into clear next steps, so underwriting and loss control teams can act faster with better visibility into risk and progress.

Improve underwriting and portfolio decisions

An AI-enabled property data model supports pricing, underwriting, reinsurance, and risk-scoring decisions, while Azure Maps provides more precise location intelligence.

LOSS CONTROL SURVEY SOFTWARE AND CONNECTED WORKFLOWS

Assess risk anytime and anywhere through field surveys, digital self-service surveys, video and digital loss control inspections while reusing captured data across workflows to accelerate decision-making.

Improve operational efficiency with DynForms, bulk prompt uploads, DocScribe Answer Agents, richer form configuration, and connected General Liability audit workflows to move teams from inspection to action faster.

We can perform in-depth data mining, uncovering key metrics that help effectively and efficiently target resources and services for policyholders. Ultimately, policyholders benefit from increased portal access, enhanced technical support and streamlined work products."
