MAJESCO P&C INTELLIGENT CORE SUITE

# Lead with AI. Transform with Confidence.

majesco

Majesco P&C Intelligent Core Suite is the AI-native, full-suite operating core that puts connected intelligence inside the work, not next to it, so insurers can amplify what works, move faster, and modernize with transparency, control, and upgrade readiness.

P&C insurers are under pressure to improve growth and profitability while reducing operational cost and friction. Majesco P&C Intelligent Core Suite helps insurers modernize the operating core with connected core administration, digital engagement, integrated workflows, and trusted data across policy, billing, and claims. Embedded intelligence, AI, and copilots, including the first wave of Immersive AI, bring intelligence directly into P&C Intelligent Core workflows, helping teams work more efficiently, make better decisions, and deliver better experiences for agents, customers, and internal users.

**Connected Intelligence** **Governed Automation** **AI-Native Core**

**75%** faster quotes

**98%** cash-application accuracy

Up to **78%** faster deployment

**50%** faster implementation

updates in less than **14** days

WHAT MATTERS MOST

## Intelligence that moves insurance forward

### Connected Intelligence

Make faster, more confident decisions with guarded, next-best-action intelligence from Immersive AI in P&C Intelligent Core workflows. Copilot and the operational cockpit connect quote, policy, billing, and claims context, while predictive models and Premium Audit–Policy integration strengthen underwriting decisions.

### Governed Automation

Reduce friction and improve straight-through processing with governed automation. Copilot and purpose-built AI Agents streamline routine policy, billing, and claims work while keeping people in control of exceptions, compliance, and complex decisions.

### AI-Native Core

Modernize at your pace with a full-suite operating core that connects policy, billing, claims, servicing, and digital engagement. A modular, API-first foundation enables faster change, phased PAS modernization and Immersive AI adoption, and lower delivery risk without a disruptive cutover.

BUILT FOR MODERN CORE OPERATIONS

**Unify operations** to connect data and work across the insurance lifecycle.

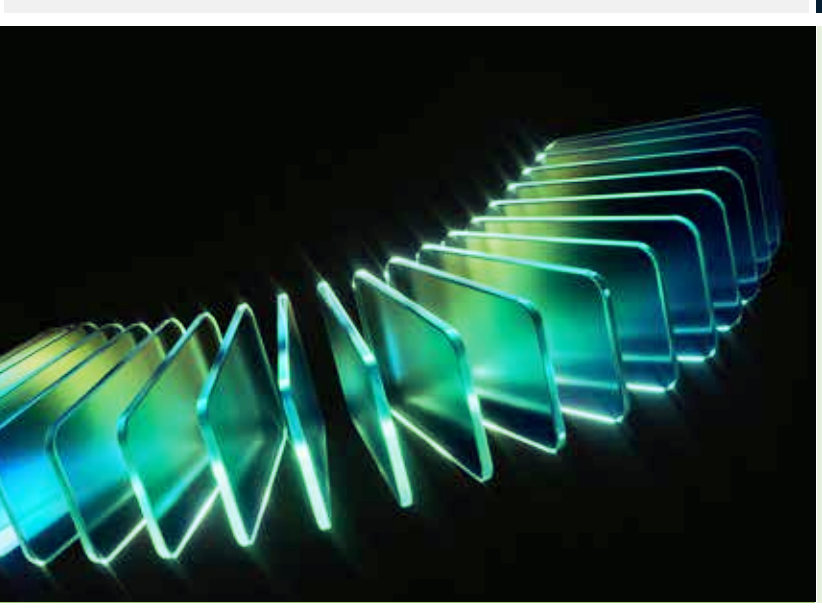

**Stay adaptable** with upgrade-ready architecture that supports faster product updates and configuration changes.

**Improve productivity** by accelerating quote-to-bind and streamlining routine processing.

**Empower users** to extend core capabilities through Agent, Customer, and Electronic Bill portals across P&C lines.

> "We are thrilled to offer our customers next-gen experiences and products on our new insurance platform across the entire operation from underwriting, policy, billing, claims in multiple lines of business. The MRSGNA and Majesco teams share a forward-thinking mindset with an emphasis on adopting best practices and scalable solutions that allowed us to extend capabilities and introduce new products quickly."

**Chris Skowronski**
*Chief Operating Officer, Munich Re Specialty Group North America*

## Modernize the core with confidence, control, and connected intelligence.
